

Empowering practices to reduce cyber risk through actionable security metrics.

Our Advanced Cyber Prevention Suite provides:

- Endpoint Vulnerability Scans 6 times daily
- External/Firewall Vulnerability Scans
- Biannual External Penetration Tests
- Healthcare-Specific Cybersecurity Awareness Training Course for Staff (CE Credits Awarded)
- Advanced Remediation for Faster Patching of Vulnerabilities
- AI-Powered Managed Threat Detection & Response to Identify and Kill Malicious Activity within Your Network, Monitored 24/7 by Black Talon

With our EAGLEi™ cyber risk management platform, everyone—from doctors and practice administrators to IT resources—can easily evaluate the practice’s current risk level, view trends over time, and dive into the elements that form the Cyber Risk Rating.

Data points providing essential details on hardware and software vulnerabilities, threats and attack attempts, firewall misconfigurations, staff cyber training, and more are clearly presented and actionable by your team.

The Black Talon team is your trusted partner, working alongside practice leadership and technical resources to continuously evaluate risk and help defend your practice from cyberattacks.

For more information on our advanced cybersecurity services and to learn how to protect your practice, visit blacktalonsecurity.com or call (800) 683-3797
