CHALLENGES

Beat the Giants. Cut Through the Noise. Eliminate the Grind.

It isn't about expertise alone anymore. It's about delivering premium, multi-framework compliance without adding headcount.

The Margin Squeeze

Expensive legacy GRC tools, new framework taxes, rigid subscriptions, and manual delivery models force MSPs to reduce margins just to compete.

You're either absorbing cost or cutting price.

The Execution Grind

Spreadsheets, PDFs, and disconnected tools slow delivery. Evidence mapping, control cross-referencing, and repetitive setup drain billable hours and dilute expertise.

Your team spends time managing data instead of delivering insight.

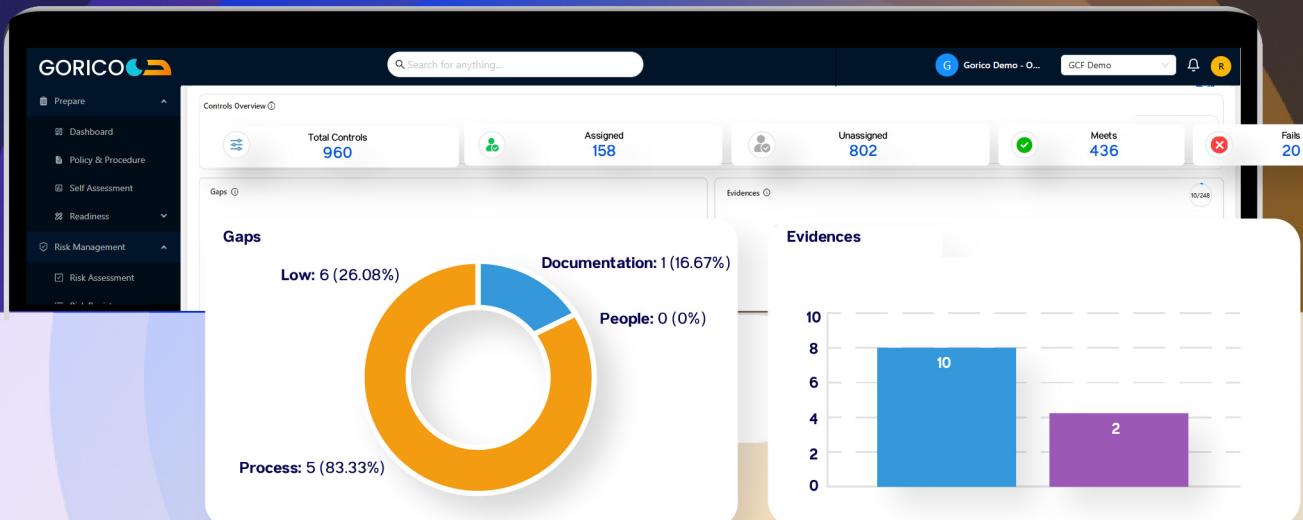

The Relevance Gap

Clients now expect automation, dashboards, and platform-backed execution. Meanwhile, large firms own proprietary platforms and DIY tools promise speed—leaving you squeezed in the middle.

Without a platform, you look outdated. With the wrong one, you lose control.

Drive Your Own GRC Destiny - Powered by GORICO

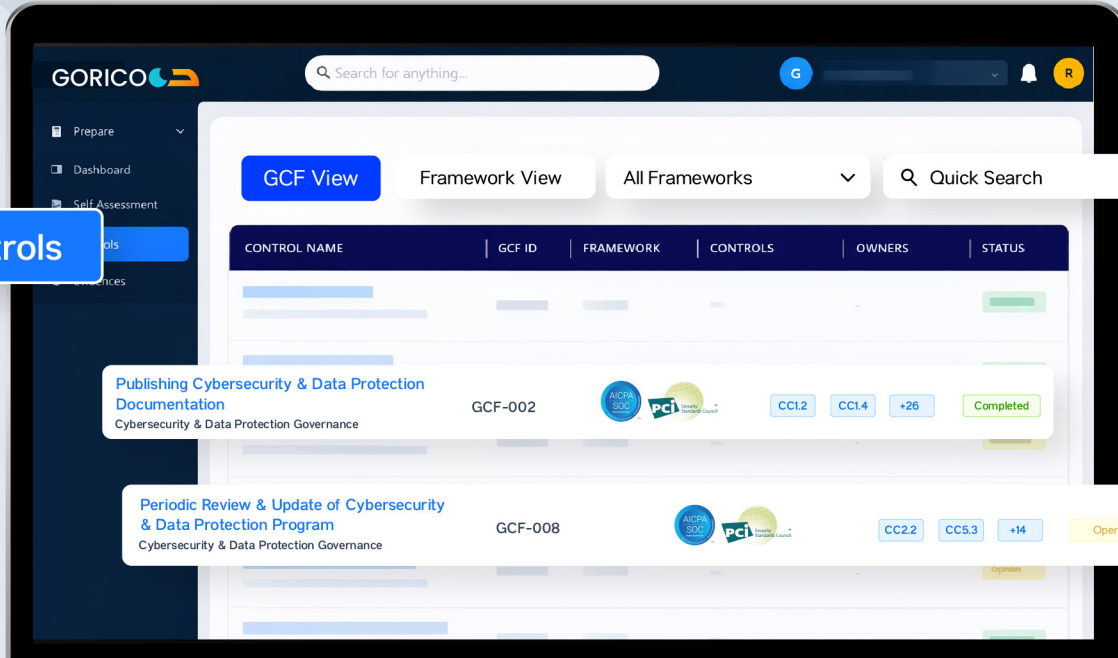

GORICO lets you deliver through your own execution engine, so you're never at the mercy of commoditized marketplace tools.

READINESS WITH GORICO

Compliance That Extends Beyond the Audit

Built to support compliance before, during and after the audit

Eliminate Duplicate Work Across Frameworks

Instead of rebuilding the same requirements for every framework, GORICO lets teams define a control once and reuse it across SOC 2, ISO, PCI, and more - reducing rework and keeping delivery consistent.

Built for How MSPs & Security Partners Deliver

Controls are assigned, tracked, and managed in one place, making ownership clear and helping teams deliver compliance services smoothly across multiple clients and engagements.

Instant Visibility Into Readiness

Simple status indicators - Open, In Progress, and Completed - make it easy to see what's done, what's pending, and what needs attention, without relying on reports or follow-ups.

ZERO EVIDENCE LOSS

Evidence Is Where Audits Are Won Or Lost & Where Most Teams Struggle

Evidence Tied Directly to Controls

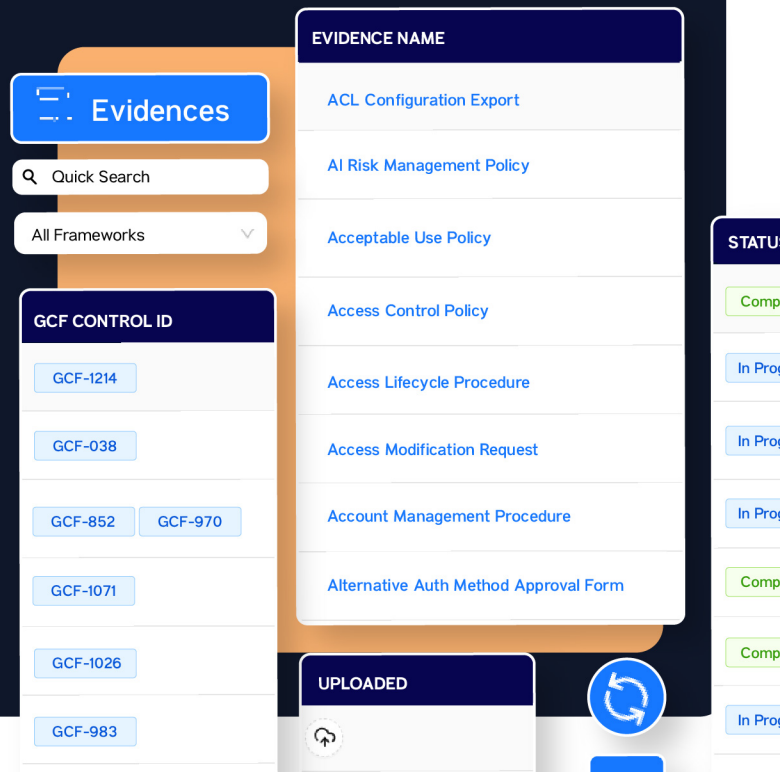

Every artifact in GORICO is automatically linked to the exact control it supports, giving teams instant traceability and eliminating last-minute audit scrambling.

Collect Once. Reuse Everywhere.

Upload evidence a single time and reuse it across controls, frameworks, and audit - making it easier for MSPs managing multiple client projects within an organization to stay consistent without duplicating effort.

Always Know What's Audit-Ready

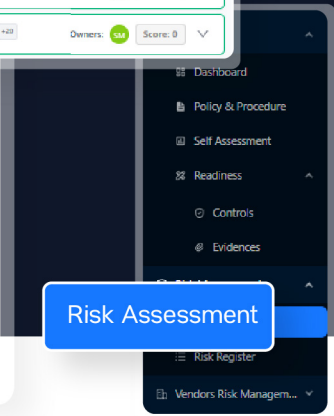

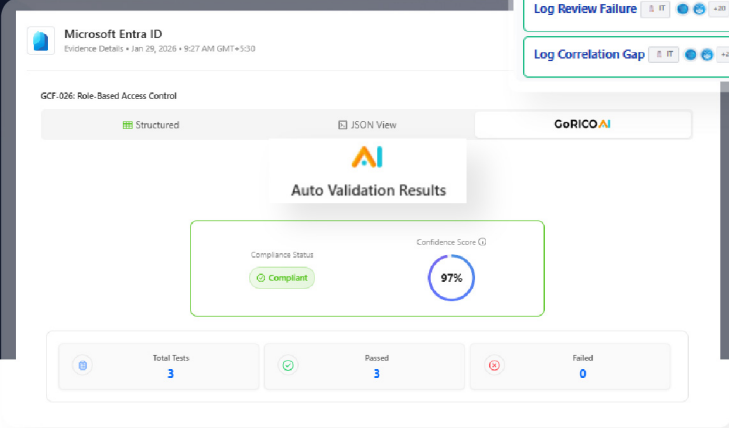

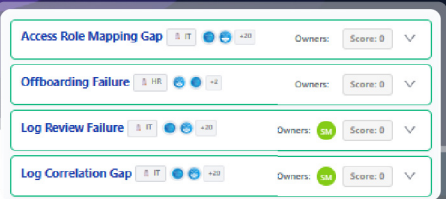

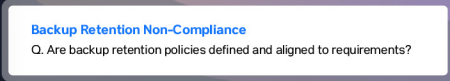

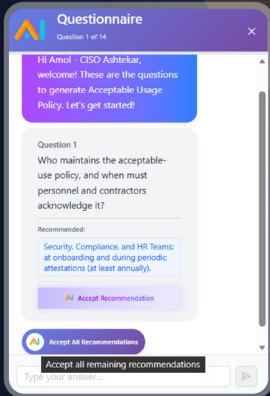

Live evidence status shows what's complete, what's pending, and what needs follow-up - so audits are managed continuously, not reactively.

BUILT-IN INTELLIGENCE

A Platform That Lets You Own Your Delivery - and Your Growth

From insight to action - without manual effort

GORICO Uses AI To Move Teams From Risk Identification To Action

AI Policy & Procedure Generator

Generates tailored policies and procedures aligned to selected frameworks, eliminating manual drafting and formatting effort saving approximately 30-60 hours.

Automated Evidence Review Agent

Performs the first pass review of uploaded evidence, checking completeness and relevance before auditor involvement saving at least 20 hours per client.

Evidence Mapping Assistant

Assists in mapping evidence to the correct controls across frameworks, reducing manual tagging and cross-referencing effort saving at least 50 hours per engagement.

AI Risk Assessment Agent

Reviews policies and procedures to identify risks, auto-populates risk context, and updates the risk register.

Generate Custom Policy

Create a customized policy by answering all the required GoRICO AI questions

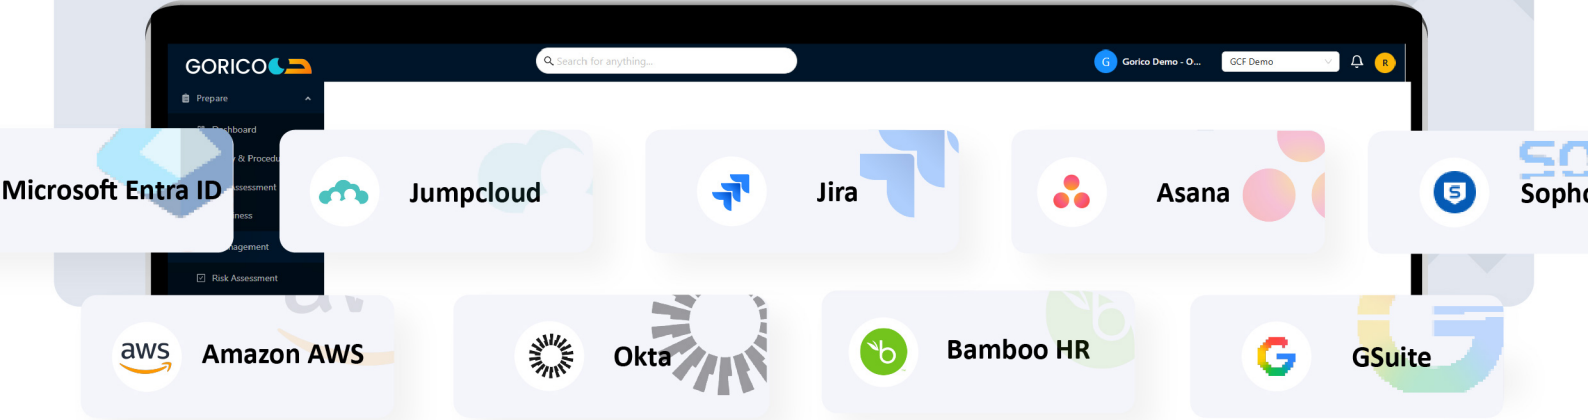

Generate Policy With AI Suggested Answers

Automatically generate a policy using default AI-recommended responses for all GoRICO AI questions

INTEGRATIONS

Integrates With Your Existing Tools

Integrations automate evidence collection, reducing manual effort while giving auditors clear visibility into evidence accuracy and traceability.

A Platform Built to Turn Compliance Requirements Into Real Execution

Own the Execution Layer

GORICO gives you your own delivery platform—AI-enabled, and built for practitioner-led execution. You're not renting someone else's tool. You control the workflow, pricing, and positioning.

Scale Profitably, Not Painfully

Run all clients and frameworks on one platform without punitive framework fees. Standardized, repeatable delivery turns efficiency into margin and growth into profit.

Turn Expertise Into a Competitive Weapon

AI handles first-pass reviews, policy drafting, evidence mapping, and risk population—so your team focuses on judgment, strategy, and closing deals. Walk into meetings with readiness insights. Deliver like a firm ten times your size.

METRIC	"BIG BOX GRC"	MANUAL/SPREADSHEETS	GORICO
Cost To Serve/ Per Client	High (Per-user/per framework fees)	High (Labor intensive)	Low (Flat rate + AI automation)
Evidence Mapping	Manual Drag-and-Drop	100% Manual	AI Auto-Mapping
Client Onboarding	2-4 Weeks	4-6 Weeks	< 48 Hours
Modules/ Agentic Flows	Included or, Paid Add-on Module	Not Applicable	Pay For What You Want
Upsell Opportunity	Low (High platform costs)	Low (No bandwidth)	High (Add frameworks instantly)
